VOLVO Group

26 March, 2024

Hi ,

With this letter I would like to express my interest and passion in Job in VOLVO Group.

I am Simanta and have a very good knowledge of Microsoft and Data-driven technology. Overall, 10 years of software development experience. A data science enthusiast programmer. Responsible for low and high-level design of applications and deliverables. I am a person with a positive attitude and love to work with teams and challenges. A problem solver and always brings an ideal solution for it. My hobbies and interests are in technology, innovation, going to GYM and reading newspapers.

I have done my master's degree in Data Science and Machine Learning from PES University, India and had completed my Bachelor of Engineering from Gauhati University in Computer Science.

I am deeply involved in the requirement gathering, Analysis, Design, Development, Testing and Maintenance of software.
My Master's thesis 'Regional soil health analysis using machine learning' is a collaboration with Assam Agriculture University to develop and analysis of soil data and build machine learning models for Physical and chemical Indicator of Soil and develop a crop recommendation system.

Having a very good experience in software development and data related Technology. Monitor and guide junior developers as well. I am an active team member focus on customer and business success with technology.

I worked with VOLVO Truck , Buses and Renault Truck around 6.5 years of my career.
Developed Several Projects for Aftermarket, R&DP Volvo Truck and Project Management solution for Volvo Buses.

Sincerely,
SIMANTA JYOTI MEDHI
